

# Pulse AI – Investor Pitch Deck

A fully polished, production-ready AI analytics codebase available for acquisition, investment, or onboarding partnership.

# Problem

Businesses drown in data but lack tools that turn real-time signals into clear, actionable insights. Traditional dashboards are slow, static, and disconnected from decision-making.

# Solution – Pulse AI

A complete, modern AI-powered signal intelligence engine with:

- Real-time anomaly detection
- Smart forecasting
- Automated insights
- Beautiful UI/UX with adaptive glassmorphism branding
- Enterprise API layer
- Modular architecture designed for scale

# Product Overview

Pulse AI's system includes:

- Frontend: fully polished UI with adaptive glass iconography
- Backend: robust API, streaming pipeline, and vector intelligence layer
- ML: forecasting, clustering, scoring, and embeddings-driven insight engine
- DevOps: containerized, production-ready deployments

# Market Opportunity

AI-first analytics is projected to exceed \$140B by 2030. Companies urgently need real-time, automated insight tools as AI workloads, sensors, and operational complexity surge.

# Business Model

The platform is ideal for:

- Enterprise SaaS (tiered)
- API licensing
- White-label analytics
- Direct acquisition of the full IP + codebase

# Competitive Advantage

- Fully built codebase (not a prototype)
- Superior usability and design polish
- Modular engine with fast extensibility
- Extremely low time to market for any acquirer

## Traction & Status

- Codebase is complete
- Brand design is complete
- Ready for integration, onboarding, or sale

# Acquisition / Investment Options

- Full sale of codebase + IP
- Majority stake acquisition
- Minority investment to scale with founder
- Technical onboarding available
